Type 052D destroyer

Navy for russia

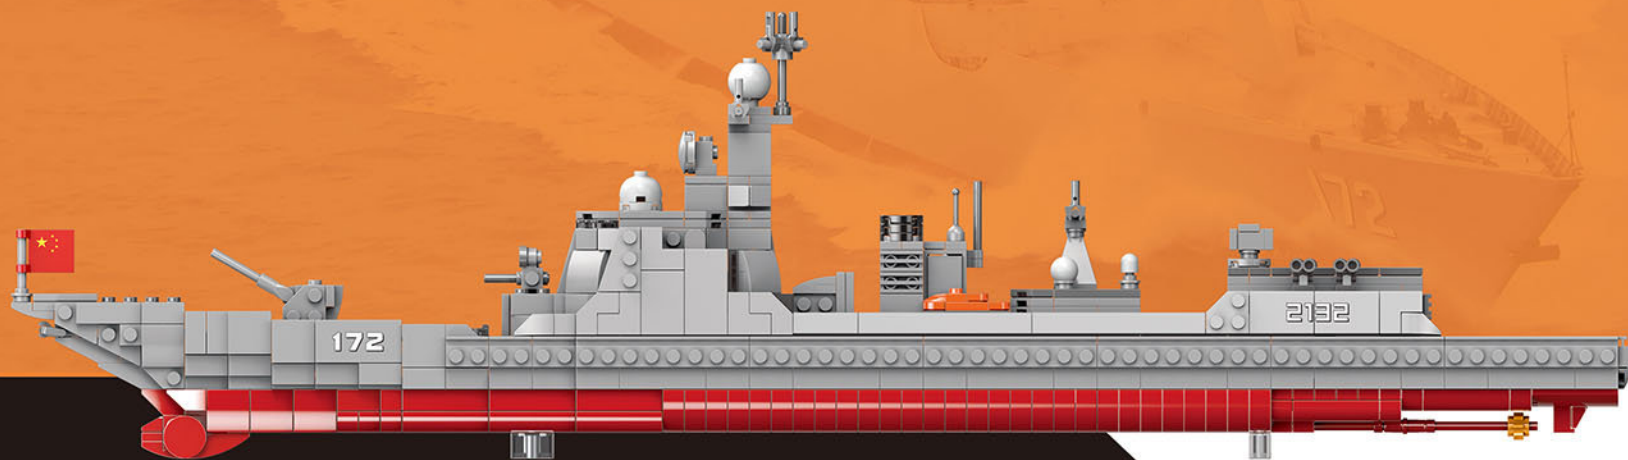

ABOUT TYPE 052D DESTROYER

1. Type 052D destroyer (NATO code: Luyang III-Class destroyer, Chinese: 旅洋III级驱逐舰) is the latest generation of guided missile destroyer of the Chinese People's Liberation Army Navy. It has 4 served ships, 4 armored ships and 6 ships under construction. It is the latest improved version of the 052C destroyer, and also a modern air defense destroyer equipped with phased array radar and vertical launch area air defense missile system after China's 052C destroyer.

3. The first 052D Kunming destroyer was launched on August 28, 2012, and officially joined the PLA Navy battle on March 21, 2014.

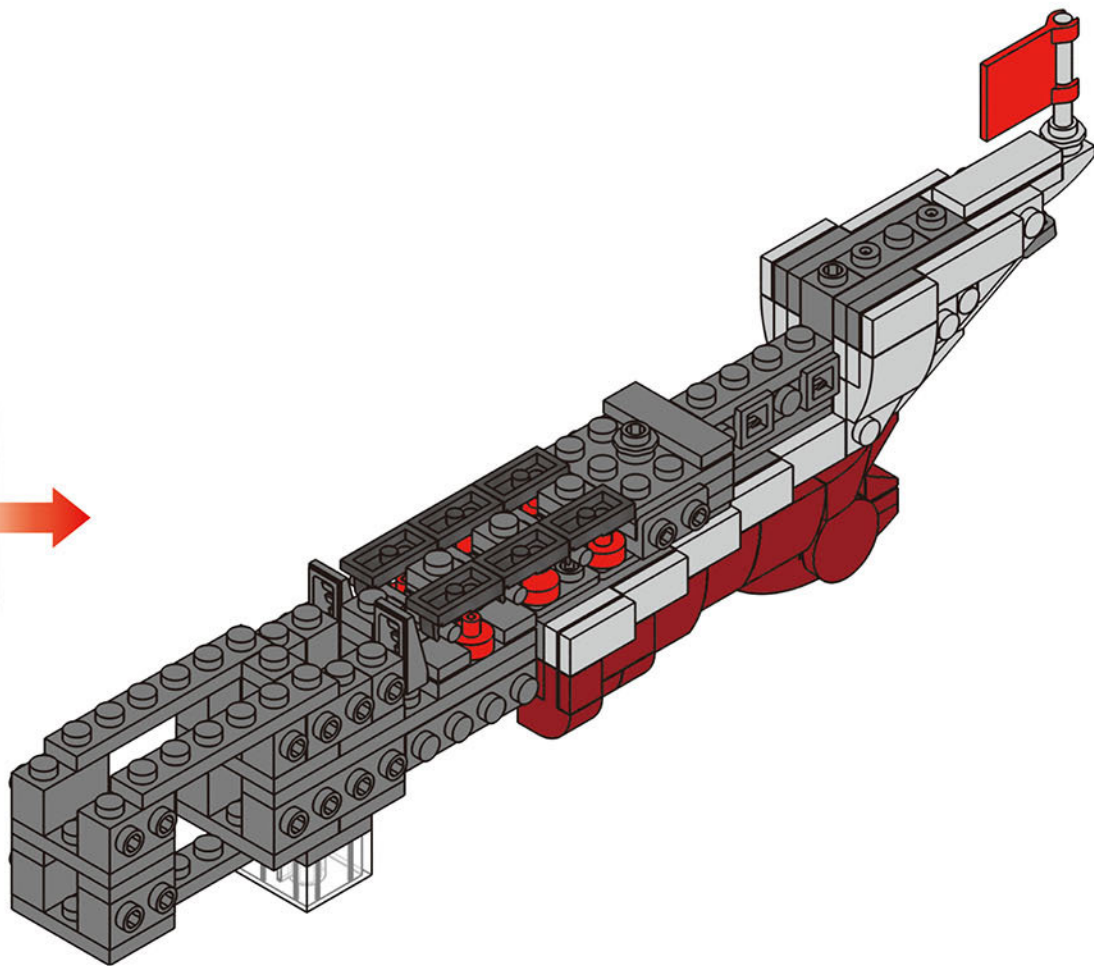

2. After the German Sachsen-class frigate, the De Zeven Provinciën-class cruiser, the Iver Huitfeldt-class frigate, the Japanese Akizuki-class destroyer, and the Japanese Hyuga-class helicopter destroyer, the 052D destroyer is the sixth equipped with four-sided active phased array radar and universal vertical launchers, which marks China begins to have new air defense ships among the world. The exposure of the fifth 052D under construction makes China the country with the largest number of ships.

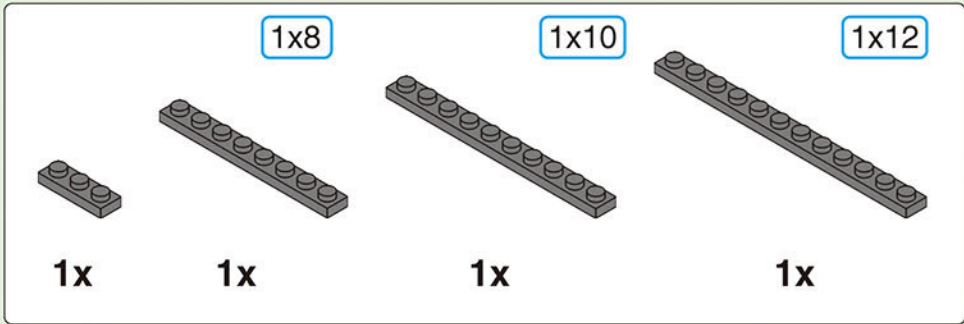

4. In July 2016, the 4th 052D destroyer of Chinese Navy was officially in service.
